- [Book] Writing The Rural: Five Cultural Geographies [writing-the-rural-five-cultural-geographies]
- Practising Human Geography—Paul Clarke 1994-07-26 This book arises out of an ESRC project devoted to an examination of the economic, social and cultural impacts of rural change on rural areas. The research was an attempt to document these impacts through close empirical work in a set of three rural communities, but something happened on the way. The authors found that the rural became a real sticking point. Respondents used it in different ways - as a bludgeon, as a badge, as a hammer - to signify many different things - security, identity, community, domesticity, gender, sexuality, ethnicity - nearly always by drawing on many different sources - the media, the landscape, friends and kin, animals. It became abundantly clear that the rural, whatever chameleonic form it took, was a prime and deeply felt determinant of the actions of many respondents. Yet it was also clear that to the authors they possessed no theoretical framework that could allow them to negotiate the rural to construct its diverse nature as a category. Rather each of the extended essays in the book is an attempt by each author to draw out one aspect of the rural by drawing on different traditions in social and cultural theory.

- Rural Racism—Neil Chakraborti 2013-15 Rural issues are currently attracting unprecedented levels of interest, with the debates surrounding the future of ‘traditional’ rural customs and practice becoming a significant political concern. However, the problem of racism in rural areas has been largely overlooked by academics, practitioners and researchers who have sought almost exclusively to develop an understanding of racism in urban contexts. This book aims to address this oversight by examining notions of ethnic identity, ‘otherness’ and racist victimization that have tended to be marginalized from traditional rural discourse.

- Geographies of Rural Cultures and Societies—Moya Kneafsey 2017-09-The last decade or so has witnessed a flourishing of research in rural geography; in particular, approaches which have developed socio-cultural perspectives on rural issues. This book brings together well-established and newer researchers to examine the position of rural social and cultural geography at the beginning of the 21st century and to suggest new research agendas. It offers critical evaluations of theoretical positions and advances, introduces new conceptual and methodological tools and perspectives to current research on rural issues and discusses the ways in which the outbreak affected the fabric of rural life and rural culture across class and generations. The 2001 foot and mouth disease epidemic in the UK had a devastating and long-lasting impact on individuals and communities. Although many studies about FMD have been published since 2001, this is the first book to examine in any detail the ways in which the outbreak affected the fabric of rural life and rural culture across class and generations.

- The Social and Cultural Impact of Foot and Mouth Disease in the UK in 2001—Martin Döring 2009-10-15 The Social and Cultural Impact of Foot and Mouth Disease in the UK in 2001

- The Local Historian—Neil Chakraborti 2013-5-11 The Local Historian

- Environment & Planning A—1994

- Environment & Planning B—2006

- Environment and Planning—2006

- Rural Wales—Neil Clarke 1997 Between 1990 and 1993 the authors worked together on a research project based at University of Wales, Lampeter. The report was commissioned by the Welsh Office, who did not publish the findings. This text analyses and interprets this research to produce a possibly controversial picture of contemporary rural life in the welsh countryside. This comprehensive view of post-war Welsh rural life looks at social and cultural issues, housing and social change, employment, incomes and poverty, transport, community and environment.

Rights of Way - C. Watkins 1996 The issue of public access to the countryside is currently the subject of great debate. In many parts of Britain the combination of agricultural intensification and increased traffic on roads means there are now fewer pleasant or safe places to walk in the average stretch of countryside, despite the increase in the number of country parks and other recreational facilities. Hidden under these trends is the ancient and fundamental conflict between land owners and others: the right of ownership versus the right of citizenship - a conflict of cultural tensions which will intensify if major expansions of tourism in the countryside take place. These complex issues of the access debate are discussed in three main sections: policy, culture and management. This book explores the theme of public access to the countryside through the eyes of a variety of commentators and researchers. The authors come from a range of academic disciplines including geography, rural land management, sociology and economics.

Understanding Contemporary Ireland - Brendan Bartley 2007 This is an account of Ireland in the twenty first century and the remarkable economic and social transformations that have occurred since the late 1980s. The 'Celtic Tiger' phenomenon made Ireland the focus of much attention in recent years. Other countries have openly declared that they want to follow the Irish economic and social model. Yet there is no book that gives a comprehensive, spatially informed analysis of the Irish experience. This book fills that gap. Divided into four parts - planning and development, the economy, the political landscape, and population and social issues - the book explains a particular aspect of Ireland and Irish life. The authors reveal how the transformations that have occurred are uneven and unequal in their effects across the country and highlight the challenges now facing Irish society and policy-makers.

The social and economic transformation of the rural Latvian landscape - George Daugavietis 2002

Jurgen Habermas (III) - Joan Nordquist 1998

Town & Country Planning - 1995

Gandhi Marg - 2008

Knowing Capitalism - Nigel Thrift 2005-02-16 This title looks at what the author calls 'the cultural circuit of capitalism', the mechanism for generating new theories of capitalism. The book traces the rise of this circuit from the 1960s to the present day.

Agrindex - 1995

Poverty Alleviation for All - James R. Chamberlain 2002

Amalgamations - Suzanne Lensin 1999 Contains seven essays on the amalgamation of technology and culture, including; the amalgamations of technology and culture; technology and everyday life; hidden stories of hearing aids; modern genetics and the alem inside; and, biotechnology and the reinterpretation of nature.

Current Geographical Publications - University of Wisconsin-Milwaukee. Library 1995 Current Geographical Publications (CGP) is a non-profit service to the scholarly community initiated in 1938 by the American Geographical Society of New York. Beginning in 2006, the format changed to include the tables of contents of current geographical journals. The journal titles listed link to web pages or PDF scans of the current issue's contents.

Books in Print Supplement - 2002
